Playback, navigation and replay

Korean / English switching

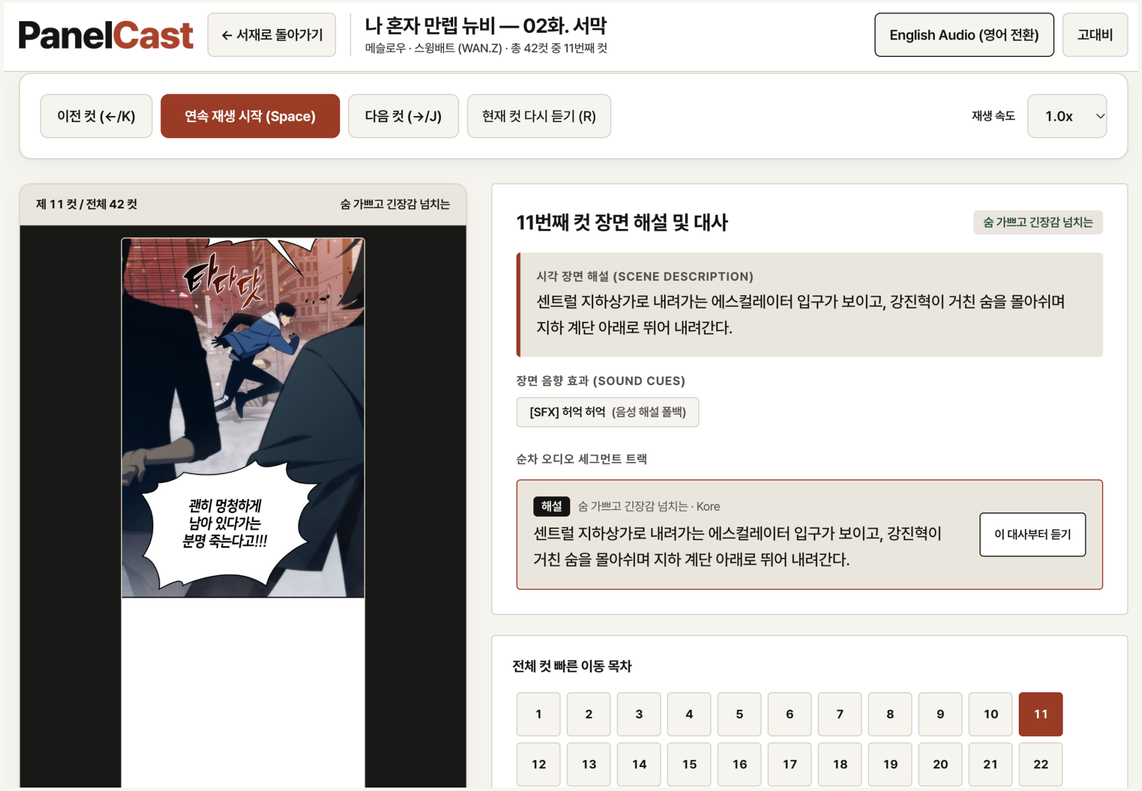

Screen-reader and high-contrast support

Cut-specific narration feedback

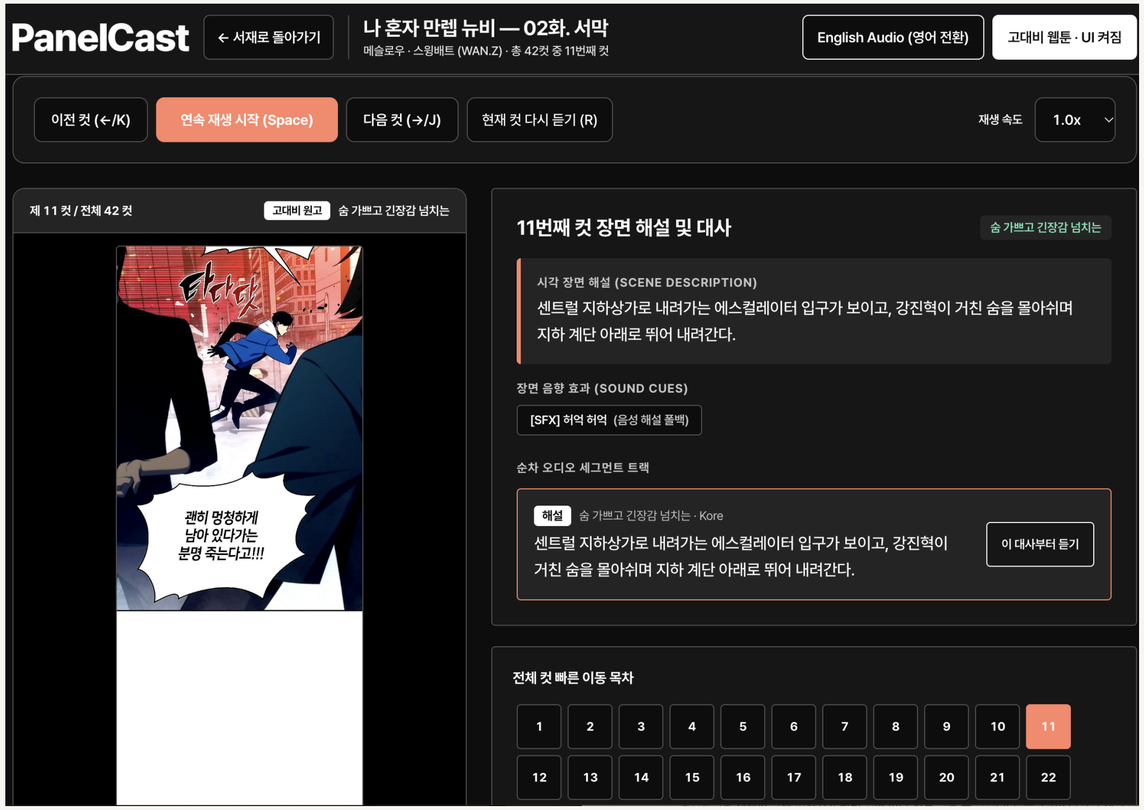

High contrast, down to the artwork

Standard view

AI-enhanced artwork + high-contrast UI

Generate. Check. Regenerate.

Gemini 4 Argon

Scene, dialogue and speaker analysis

Gemini 3.8 Flash TTS

Korean and English speech generation

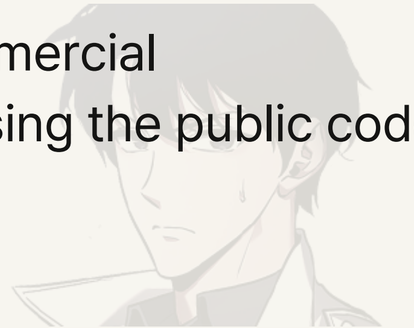

Generate → Validate → Correct → Recheck → Publish

Script edits trigger audio regeneration for the affected segment

Google Cloud Run · Cloud Tasks · Firestore · Private Cloud Storage

Expected impact

Readers	More access to webtoons for blind and low-vision readers
Creators	Less repetitive work in narration and audio production
Platforms	Integration into commercial webtoon services using the public code

Before platform adoption: explicit code licensing and rights to the manuscripts
